EDUCATION

G. H. Patel College of Engineering and Technology

B.E. in Information and Technology CGPA - 9.18/10

 July 2017 – Present  Anand, GJ

- Coursework — Data-structure and Algorithms, Web Technologies, Operating Systems, Database System, Programming languages, Software Engineering.

EXPERIENCE

Software Engineer Intern @ZopSmart Feb – Jun 2021

- Working on Bulk-Data Migration and Data Sync for Digital and loyalty data using ETL architecture in Golang.
- Developing different endpoints for Enterprise customer API using layered architecture.
- Involved in writing Unit & integration test-cases, end-to-end testing and reviewing code.

Software Developer Intern @Cerebulb Jul – Oct 2020

- Build Rest-APIs, Dashboard, and services for the software licensing portal.
- Worked on building a Desktop application that allows lossless and continuous transmission of data between WITS to OPC over TCP/IP or serial communication and also analysis of data with InfluxDB.

OTHER EXPERIENCE

 **Honourable Mention ** (2019)
Secured 79th rank in online round of ICPC Asia Kanpur regionals.

Kharagpur winter of code (KwOC) (Dec 2020 – Jan 2021)
• Mentored and contributed to Contest Reminder project.

Open-source Contributor to GSSoC (Mar – May 2019)
• Contributed in project cosmos during GirlScript Summer of Code.

TCS Codevita (2019)
• Ranked 439th, in CodeVita-2019 Round-1 .

Competitive Programing
• Actively participating in programming contests on codeforces, codechef, hackerearth, hackerrank.

LEADERSHIP AND INVOLVEMENT

 **President, GCET Codechef Chapter**
Actively nurturing programing culture on campus by conducting technical sessions on data structures and algorithms for competitive programing.

 **Tech-lead and Developer, GCET-CSI SB**
Coordinating and organizing various coding, technical events and conducted SIG's. Designed and Managed Website for Computer Society of India, GCET Student Branch.

SKILLS

Programming Languages

- C, C++, Golang, Python

Web-frameworks

- Django, Flask, Gin

Database

- MySQL, PostgreSQL, MongoDB, Redis

Others

- Kubernetes, Docker, Git

PROJECTS

Codepod

- Podcast player web-app for all the coding and technology related podcasts that let's you follow and download different podcasts. (Ongoing)
(Golang, MySQL)

Contest Reminder

- Reminds contest of Codechef, Hackerearth, HackRank before one hour via mail, once user subscribe to system with mail.
(Django, MySQL)

ChuckMate

- A Web-app that feeds new joke on every click, allowing user to change the name of main character with their dear once and allow to share with them.
(Django)

AMS Using Face Recognition

- Smart attendance management system that recognise the face and marks the attendance and save it to database.
(RaspberryPI, OpenCV, Django, MySQL)

Sentiment Analyzer

- GUI tool that tells you the sentiments of people regarding to any events, objects by analyzing tweets and see how positive or negative its emotion.
(Tkinter,tweepy, NLP(TextBlob))

CERTIFICATIONS

Deep Learning Specialization Course

- Coursera; Course offered by deeplearning.ai

Problem Solving through Programming in C & Data Base Management System

- NPTEL Exams; Specialization course offered by IIT Kharagpur.
